La Teoria della Doccia del Camping

per un'architettura *just-out-of-time*

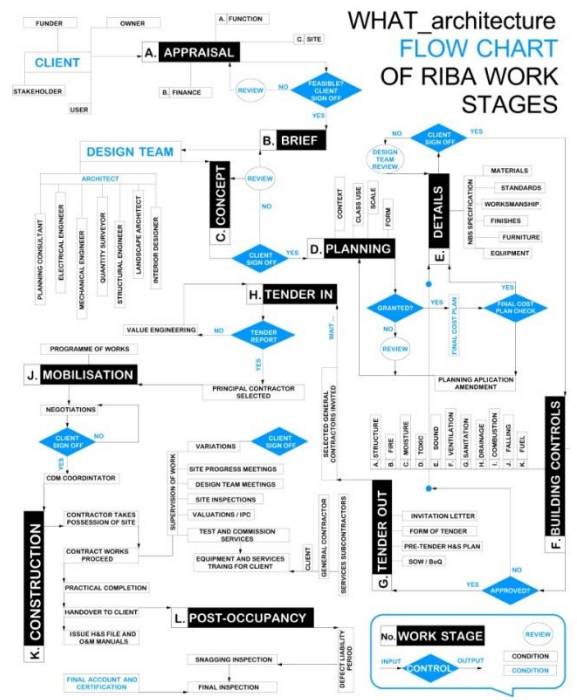

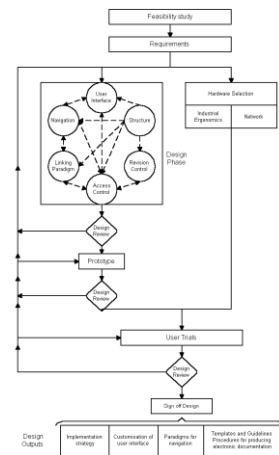

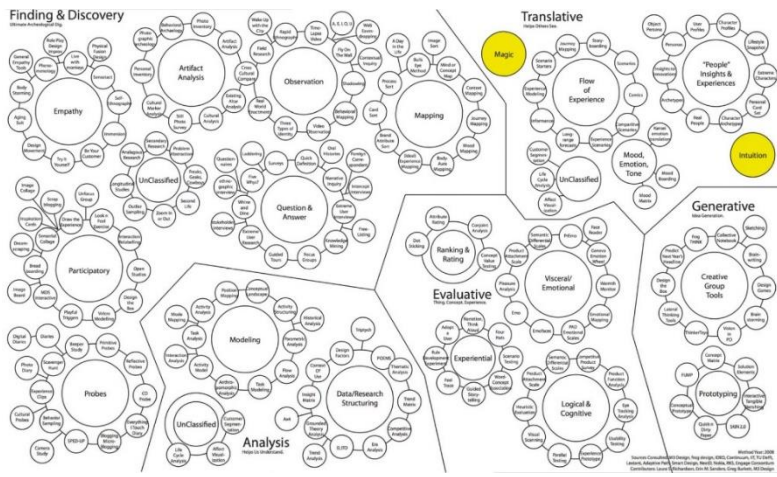

MARCHE A SUIVRE
dans la Composition d'un Projet quelconque.

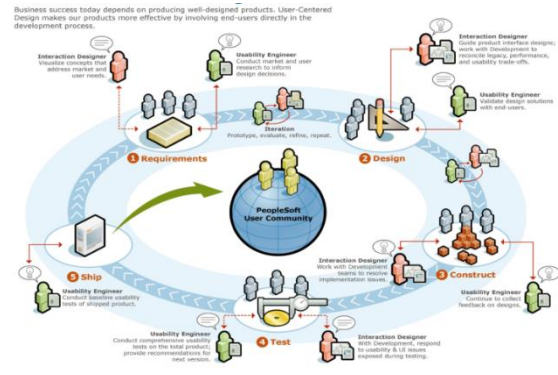

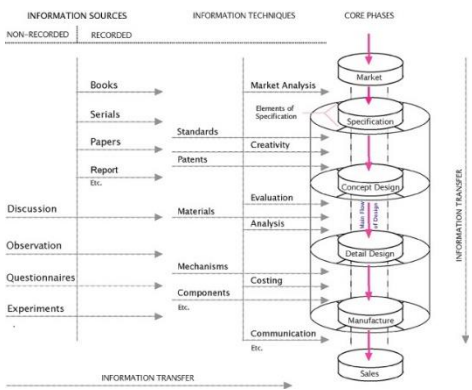

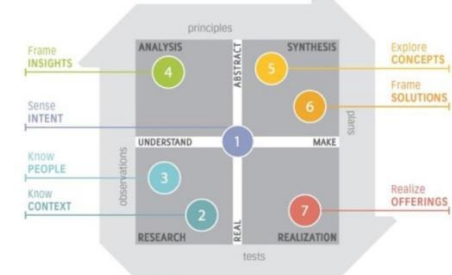

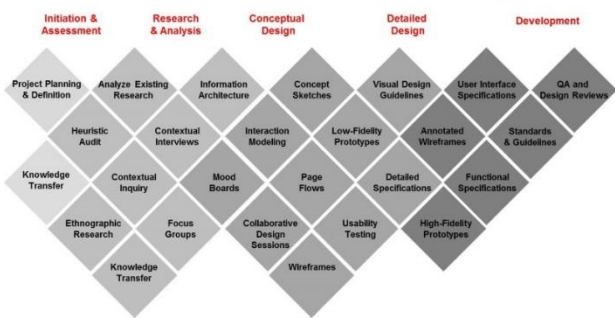

Gravé par C. Normand

“I giovani di oggi si trovano improvvisamente in una situazione in cui per le strane richieste della vita una buona intelligenza media non è più sufficiente. Non è più sufficiente, infatti, essere bravi giocatori; piuttosto si pone sempre di nuovo la domanda: è questo il gioco da giocare proprio adesso e qual è il gioco giusto?”

Ludwig Wittgenstein, *Vermischte Bemerkungen*, 1937

HBSC User Experience Design Methodology

DesignMethodology

01 Plan
Research Observe Understand Analyze

The Planning Phase

While the customer is getting ready to develop the idea into a product, I collect requirements and details from Customers/Stakeholders. I collect Research data from User Researchers. I Analyze and compare the market research results and create a design plan.

Key Players: Stakeholders/Customer, Product Managers

Research & collect data

02 Design
Use Cases Business Processess Wireframes Design Concepts

The Concept Phase

In this phase, when the basis of the application are getting ready, I create wireframes, use case scenarios, conceptual layouts and low or high fidelity prototypes. At this point, I also influence design decisions and work with development teams to resolve the legacy, performance and usability trade-offs. I make sure to validate design solutions with end users.

Key Players: Product Managers, Project Managers, Development Team

Information Architecture & Interaction Design

03 Develop
Design Handover Communicate Monitor Visual Design

The Development Phase

In this phase when the product about to reach the release stage, I work closely with the development team to resolve implementation issues. Make sure all the test cases are implemented as defined. Continue to collect feedback on designs. I make sure that all the design details are transferred effectively to the development team. I also maintain a constant communication between the Designers and the Developers.

Key Players: Product Managers, Project Managers, Development Team

Development Monitoring & Visual Design

04 Deploy
Usability Testing Verification Design Quality Check Approval

The Deployment Phase

In this phase when the product is about ready to hit the market, My role is to design & conduct comprehensive usability tests on the product and provide recommendations for the improvements in the next version of the release. I also ensure that all the usability issues critical to the release flow. This is where the project either ends or starts its cycle for the next version.

Key Players: Product Managers, Development Team, Customer, Stakeholders

FUNZIONAMENTO DEL PIANO DI CODA ORIZZONTALE

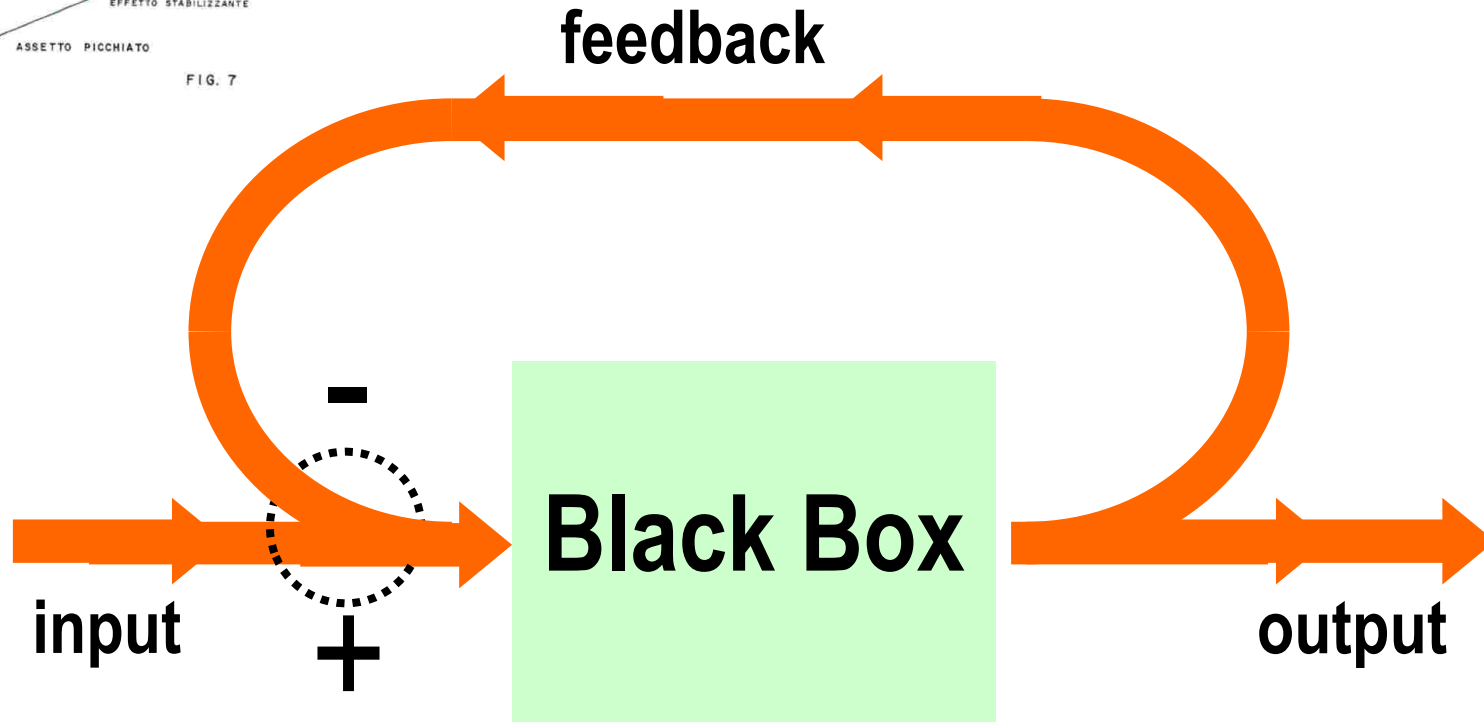

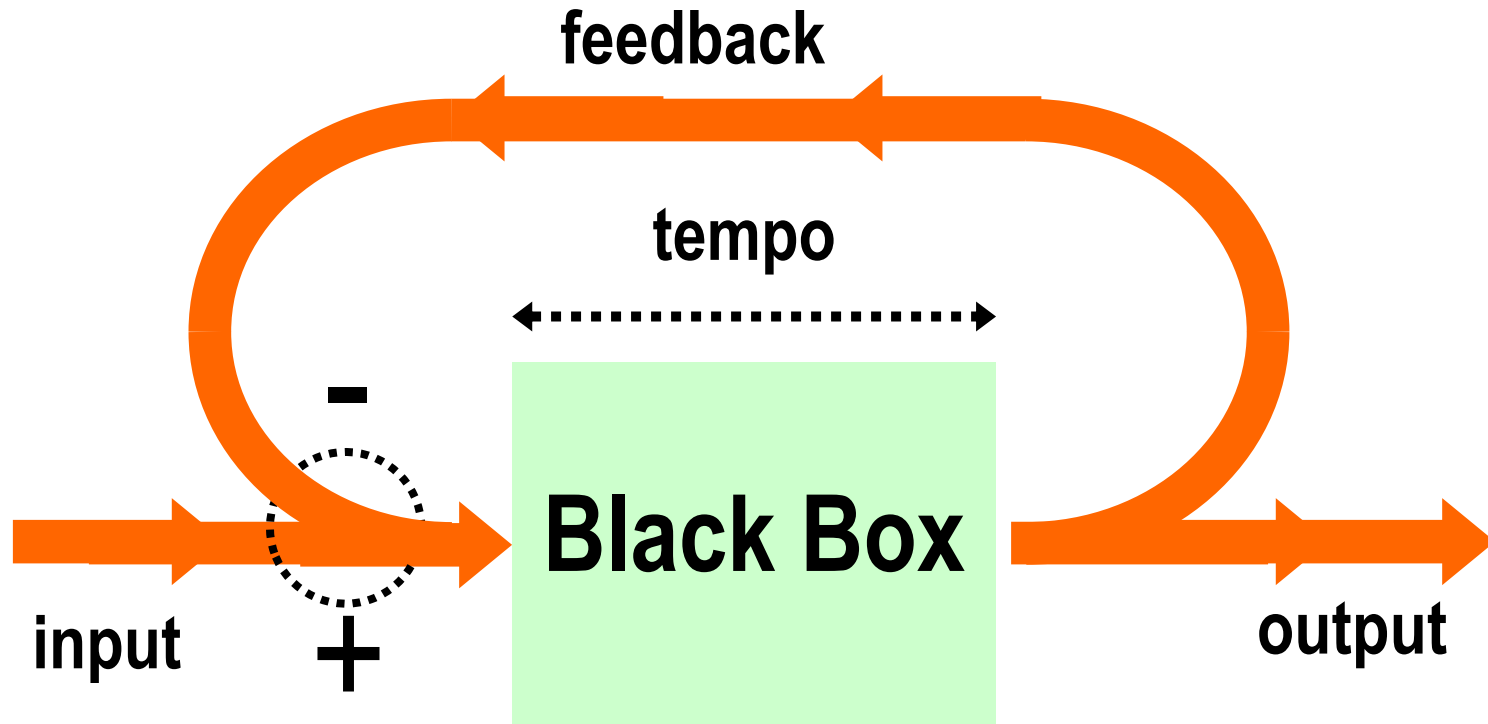

FIG. 7

L'alleanza tra densità, futurologia e greenwashing

Matti Suuronen, Futuro House, 1970

Matti Suuronen, Futuro House, now

Grandi pulci hanno piccole pulci
che mordono loro la schiena
piccole pulci hanno pulci piú piccole,
e cosí all'infinito.
In ciò è espresso con precisione e brevità il principio strutturale dell'albero.
Columbia, Maryland; opera della Community Research and

Development Inc.: unità di vicinato aggregate a grappoli di cinque, formano « villaggi ». Il sistema di comunicazioni collega i villaggi in una *new town*. L'organizzazione è un albero.
Greenbelt, Maryland, progetto Clarencestein: questa città

giardino è stata suddivisa in superblocchi. Ogni superblocco contiene scuole, parchi, e un certo numero di gruppi di case costruite attorno a parcheggi. L'organizzazione è un albero.

Non possiamo buttare via la città come facciamo con un cellulare.

Se la città fosse soltanto una «grande macchina», ogni generazione dovrebbe distruggerla completamente e ricostruirla secondo i propri
bisogni.

Nella città reale, la vita si adatta continuamente agli spazi e agli edifici esistenti, ed essi si modificano per poter ospitare le nuove abitudini individuali e collettive.

La struttura della città sopravvive alle funzioni che le hanno dato forma.

Matilde Cassani, la festa dei Sikh a Novellara (RE)

Una scodella ha una forma, una dimensione, un materiale adatti al cibo per cui è pensata, e tuttavia non cambia se la zuppa che contiene sia al pesce o alle verdure.

In maniera simile, gli spazi di una città devono essere adeguati agli usi e alla vita che accolgono, e tuttavia non sono determinati in forma diretta da un programma funzionale.

In most runs of the World3 computer model, rapid growth is followed by sharp decline. So far the standard run (main graphic) corresponds well with measurements of real-world equivalents (dotted lines)

CZ The Campsite Shower Theory

CZ a city is (not) a tree

Edificio D, ingresso

“Mentre il funzionalista cerca il massimo possibile adeguamento a un fine il più possibile specifico, il razionalista cerca **l’adattamento al più grande numero di possibilità**. Niente di più comprensibile che **il razionalista metta particolare enfasi sulla forma**. La forma nasce con lo stabilirsi delle relazioni tra gli uomini. L’uomo solitario, isolato nel mezzo della natura, non ha alcun problema formale. La questione della forma nasce con l’unione di più individui, e **la forma è ciò che rende possibile la convivenza tra gli uomini.**”

Adolf Behne, *Der Moderne Zweckbau* 1923
