SAUDI TRANSPORT AND LOGISTIC SERVICES

Riyadh International Convention & Center

Transport and logistics infrastructure

the Kingdom's multi-billion dollar engine for growth and diversification

Transportation has always been an important pillar of every nation's economy and the key to sustainable development. Therefore, it is considered one of the main sectors that contribute effectively to the renaissance of any country. Without an efficient transport sector, it would be hard to benefit from the basic advantages of any location or invest in the available opportunities for production.

Since 2008, the Saudi government have invested heavily in transport infrastructure projects as part of its efforts to expand and diversify the economy. Ports have been built, airports expanded and upgraded, and railway and metro projects initiated and in some cases already completed. Saudi Arabia is investing US\$140 billion over the

next 10 years in expanding and upgrading its transportation sector, acknowledging its big need to expand its five main sector's components: maritime, rail, road, air transportation, warehousing and distribution seaports. Major infrastructure projects include Riyadh Metro, Mecca Metro, Jeddah Airport and Riyadh Airport.

Transportation sector and population growth

The transportation and logistics sector has played a prominent role in the socio-economic development of Kingdom of Saudi Arabia. Given the worldwide trends and statistics on urban population growth, the country has always focused on re-planning and re-designing of existing cities in order to absorb the pressure of increasing urban populations, in a manner that will improve environmental sustainability and energy efficiency.

The Kingdom is implementing short and medium term strategies that will get the population to begin transitioning from conventional modes to environmentally-sustainable modes of transport. The Kingdom has begun thinking of the future needs of the population for more proactive solutions to emerge in the transportation sector in Saudi Arabia, especially in big cities like Jeddah, Riyadh and Dammam.

National Transformation Plan (Vision 2030)

The Kingdom of Saudi Arabia, under the National Transformation Plan and Vision 2030, has set up an investment program to wean the economy off its dependence on oil and enhance the development of the country. The cities in the country have grown significantly during the last years, which required the fast and steady development of the infrastructure.

The Kingdom is overhauling its transport sector as part of Vision 2030 that seeks to incorporate greater private sector participation in the economy. The Transport Ministry has already partnered with the private sector to build or operate airports, expand its ports and railways seeking bidders for the construction of a 1,600-kilometer railroad linking the Red Sea with the Arabian Gulf at the end of this year. Saudi Arabia has also earmarked 52.16 billion riyals for infrastructure and transport projects in the 2017 fiscal year, up from 39 per cent from actual expenditures for the sector in the previous fiscal year.

The plan focuses on the localization of the transportation and logistics services sector through the adjustment and connection of the investors with open opportunities. The initiatives and goals focus on train manufacturing in Makkah and Jeddah, operating and maintaining of the metro in Riyadh, manufacturing the components of buses, trains and metro, establishing a strategy to localize the airlines, supporting Saudi sea and land port to localize the coastal processes and laying a unified investment vision to direct the investments to serve the national economy of the Kingdom.

Saudi Arabian infrastructure projects

Saudi Arabia has allocated \$43.8 billion for transport, logistics, telecommunications and other related infrastructure

Some of the main transportation projects currently underway are:

- 01** Haramain High Speed Rail (\$11.1bn): project covering a new 450km high-speed rail line linking Saudi Arabia's holy cities of Makkah and Madinah to Jeddah and to the new King Abdullah Economic City being constructed in Rabigh. The project is set to complete next year.
- 02** Jeddah Metro (\$8.5bn): The project will include three lines. The main one will be a 67km line with 22 stations connecting Makkah Road with Obhur, while a Blue Line containing 17 stations will run from the new King Abdulaziz International airport to the Old Airport Road. A third Green Line will run for 17km along Palestine Road and will also have a branch line to Jeddah's old airport.
- 03** Riyadh Metro (\$7-8bn): Plans for a six-line, 85-station metro network planned for Saudi Arabia's capital. It is built with a view to provide an integrated public transport system to a city whose roads are already incredibly busy, and whose population is projected to grow by 40% by 2030.
- 04** Saudi Landbridge (\$7bn): The Red Sea to the Gulf rail line is an integral part of the GCC's connected rail network. A 950km line between Riyadh and Jeddah, and a second 115km line between Dammam and Jubail are being designed. Transit times for freight between Jeddah and Dammam will be reduced to 18 hours, compared with the current sea voyage of 5-7 days, with capacity for 8m tonnes of freight a year.

Exhibit's Profile

- Passenger Wagons & Cargo Trans.
- Assembling Equipment
- Train Line Management Sys.
- Rail IT Systems
- Passenger Information Sys.
- Safety and Security Systems
- Lighting
- Train Network and Communication Systems
- Train Station Equipment, Facilities and Services
- Tunnel Construction Tools and Materials
- Customs Clearance Services
- Air Freight Services
- Rail Transportation Services
- Logistics Companies
- Shipping Agents
- Courier Services
- Supply Chain Management Services / Third Party
- Logistics
- Delivery Companies and Special Trucks
- Transportation Centers
- Logistics Facilities
- Loading systems
- Conveyer Belts
- Transportation
- Land Transportation Vehicles
- Port and Seafarers Logistics Systems
- Refrigerated Transportation
- Fleet Management Co.
- Biometric Systems
- Electronic Data Interchange Systems (EDI)
- ERP Systems
- Geographic Positioning Sys.
- Production Management Sys. (GPAO)
- Warehouse Management Sys.
- Inventory Management Sys.
- Robotics in Warehousing
- Off Site Record Storage and Management
- CCTV
- Archiving Companies and Archiving Systems

General Information

Show Organizers

In order to understand more and facilitate the development of this rapidly developing sector and highlight the wealth of existing and future opportunities that the Kingdom and wider GCC has to offer, Riyadh Exhibitions Company (REC) is proud to announce **SAUDI TRANSPORT & LOGISTICS SERVICES 2018**, to take place from **11-13 November 2018** at the Riyadh International Convention and Exhibition Center (RICEC).

The exhibition will provide a vital platform for key government decision makers, transportation bodies, port authorities and industry professionals to announce initiatives, formulate strategies, discuss up-to-the-minute case studies and exchange information on global.

The exhibition is a great resource for companies interested in learning more about Saudi Arabia's growing transportation sector. It provides companies with a valuable "first step" toward breaking into the Saudi market. It will showcase a wealth of current and upcoming opportunities in GCC, integrated transportation modes, air, land and sea transportation, combined transportation systems etc...

About the Venue

Riyadh International Convention & Exhibition Center (RICEC) is a primary exhibition venue with state-of-the-art facilities and services:

- 20,000 SQM of exhibition space (15,000 SQM indoor air-conditioned halls, 5,000 SQM outside exhibition area)
- Shipping offices, conference hall, VIP reception lounge, business and press centers, restaurants and suites.
- Parking capacity of 1,500 cars

Travel and Accommodation

Riyadh is well connected to major cities around the world thanks to its international and domestic airports, and also offers a wide selection of international hotels. Please contact the organizers for more details.

BOOK YOUR SPACE

You can book your booth at the show directly By contacting us:
